

This is a rough comparison chart between the original and revised editions of **Priscilla Gibson-Roberts' *Knitting in the Old Way*** (KITOW). It is not guaranteed to be completely accurate., but it may help you find the information you need.

*Knitting in the Old Way* is not a pattern book! It is a compendium of ideas about designing and constructing knitting that have been used by traditional knitters in various parts of the world. You'll need to be prepared to do your own calculations and to trust your instincts. If traditional knitters could do this, so can contemporary knitters.

The original edition has a section on spinning that the revised edition does not, in addition to color photographs of nine sweaters that were no longer available when the revised edition was produced. No finished garments are shown in the revised edition because the finished garments are the ones you'll be making! We don't have pictures of those (although both the author and the publisher would love to see snapshots).

In the new edition, text describing the traditional garments is adjacent to the drawings, for easier reference. The new edition also has greatly expanded technical information. This includes stitch mounts and working methods; techniques for working shaped-cap sleeves; detailed instructions for several intarsia techniques; the step-by-step basketweave (or entrelac) process; combining crochet with knitting; and other useful details.

If you would like to work from this book, please borrow a library copy or purchase your own. In either case, the author will benefit from her work in creating it. You may make photocopies of pages for your own use in designing your own sweaters. You may sell or give away garments created using the inspiration in this book. You may teach classes based on the information in this book. It would be nice if you could find a way to acknowledge the author's contribution to your process if you do so., and, if you teach, to encourage your students to buy copies of the book. If you love the book, send a note to the author in care of the publisher.

The original edition is no longer in print but can occasionally be obtained through [Alibris.com](http://Alibris.com) or [ABEbooks.com](http://ABEbooks.com). The revised edition is in print in both hardcover (ISBN 978-0-9668289-2-4.) and paperback (ISBN 978-0-9668289-6-8) The paperback has a prettier cover, but the hardcover has a Smythe-sewn binding for maximum durability. Both versions are available throughout the world from yarn shops, both local and online, and from independent, chain, and online booksellers.
